

C Driver Unit Test Report

Generated at 2026-06-05 20:55:40

Status

PASSED

Pass Rate

100.0%

Passed

12/12

Failed

0

Passed Tests

- snapshot header builds valid SNAP v2 frame
- snapshot header rejects invalid inputs
- memory payload size and framebuffer bounds
- memory d-cache invalidation aligns address range
- crypto rejects invalid inputs
- crypto matches AES-CTR known vector
- crypto chunking matches one-shot output
- uart transport rejects invalid frame
- uart transport sends encrypted snapshot
- uart transport chunks large payload
- uart transport returns resource failure
- uart transport returns HAL failure

Failures

- No failure lines found.

Raw Output

```
[PASS] snapshot header builds valid SNAP v2 frame
[PASS] snapshot header rejects invalid inputs
[PASS] memory payload size and framebuffer bounds
[PASS] memory d-cache invalidation aligns address range
[PASS] crypto rejects invalid inputs
[PASS] crypto matches AES-CTR known vector
[PASS] crypto chunking matches one-shot output
[PASS] uart transport rejects invalid frame
[PASS] uart transport sends encrypted snapshot
[PASS] uart transport chunks large payload
```

[PASS] uart transport returns resource failure
[PASS] uart transport returns HAL failure
